

METHOD AND SYSTEM FOR CACHE COHERENCE IN DSM
MULTIPROCESSOR SYSTEM WITHOUT GROWTH OF THE SHARING
VECTOR

ABSTRACT OF THE DISCLOSURE

The present invention is directed to a method and a system for maintaining cache coherence in a distributed shared memory (DSM) multiprocessor system. The method begins with a receiving of a shared access request by a receiving node, where the receiving node is an arbitrary node having at least one main memory unit containing information desired to be accessed. Then, the method determines whether the shared access request originates from a local node or from a remote node. When the shared access request originates from a local node, the shared access request is processed as a shared access request. If the shared access request is granted, a sharing vector is generated or updated to reflect the sharing local node(s). When the shared access request originates from a remote node, the shared access request is converted to an exclusive access request and the sharing vector is replaced with a pointer to the requesting remote node. This limits the potential size of the sharing vector according to the local nodes.

Declaration for Patent ApplicationDocket Number 1452.3730000

As a below named inventor, I hereby declare that:

My residence, mailing address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter that is claimed and for which a patent is sought on the invention entitled: Method and System for Cache Coherence in DSM Multiprocessor System without Growth of the Sharing Vector

the specification of which is attached hereto unless the following box is checked:

- ☐ was filed on _____;
as United States Application Number or PCT International Application Number _____; and
was amended on _____ (if applicable).

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information that is material to patentability as defined in 37 C.F.R. § 1.56, including for continuation-in-part applications, material information that became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

I hereby claim foreign priority benefits under 35 U.S.C. § 119(a)-(d) or (f), or § 365(b) of any foreign application(s) for patent, inventor's or plant breeder's rights certificate(s), or § 365(a) of any PCT international application, which designated at least one country other than the United States of America, listed below and have also identified below, by checking the box, any foreign application for patent, inventor's or plant breeder's rights certificate(s), or PCT international application having a filing date before that of the application on which priority is claimed.
